PROFESSIONAL SUMMARY

Recent Information Systems Engineering graduate (CGPA 3.71, Dean's List every semester) with a rare combination of academic excellence and real production delivery. Progressed from diploma intern to full-time Lead Developer to retained freelance consultant, architecting and shipping monolithic Java/Grails systems serving 1,500+ tenants across 13 business units. Primary backend languages are Java and C#. Current focus: full-stack .NET development using Clean Architecture, CQRS, Dapper, FluentValidation, and AWS EC2 & RDS.

TECHNICAL SKILLS

Primary Languages

Java (Proficient), C# (Proficient)

Other Languages

Groovy, PHP, JavaScript, TypeScript, Python, Dart

Backend — Active

ASP.NET Core 8, Clean Architecture, CQRS, MediatR, Dapper, FluentValidation

Backend — Exp.

Grails (Java/Groovy), Spring Boot, Hibernate, Laravel

Frontend

React.js, HTML5, CSS3, Sass (BEM), Flutter

Databases

SQL Server, MySQL, Oracle SQL, MongoDB, AWS RDS

Cloud & DevOps

AWS EC2 & RDS, GitHub Actions CI/CD, Apache Tomcat

Testing

xUnit, Moq, FluentAssertions, Cypress, Postman

Middleware

Apache Camel, ActiveMQ

WORK EXPERIENCE

The Access Group

Sep 2025 – Feb 2026

Software Intern

- Developed a Territory Planning App prototype using the Access Evo Development Kit (ASP.NET, React, SQL Server), delivering a functional internal tool within the internship period.
- Built a fully responsive marketing homepage using Access Volcanic (Ixcenul Tools), applying Sass, media queries, and BEM methodology to meet cross-device design standards.

Prisma Harta Sdn. Bhd.

Mar 2023 – Sep 2023

Lead Software Developer (Full-Time)

- Architected and led development of Tenancy Management System (TMS) from scratch using Grails/Java and MySQL, serving 1,500 properties across 13 business units under Agile methodology.
- Oversaw migration of 30,000+ historical tenancy records into MySQL, ensuring data integrity and production readiness ahead of go-live.
- Built reporting and dashboard modules with PDF/Excel export and Chart.js visualizations, improving KPI monitoring and data-driven decisions.
- Managed server setup and deployment on Apache Tomcat; authored automated database backup scripts to safeguard production data.
- Conducted user training across Tenancy, Asset, and Finance departments; mentored interns in requirement gathering and test automation.

Prisma Harta Sdn. Bhd.

Oct 2023 – Feb 2026

Freelance Software Developer (Retained — continued while pursuing degree)

Retained part-time after transitioning to degree studies — company lacked budget for a full-time replacement. Sole developer on both production systems.

- Led development of Asset Management System (AMS) integrated with TMS as a monolithic Grails/Java web app, improving complaint traceability and work order management.
- Designed Schedule Management sub-modules and analytics dashboards enabling daily, monthly, and yearly operational reporting for management.
- Maintained, optimized, and deployed both TMS and AMS in production as the sole developer throughout the engagement.

Iskandar Regional Development Authority (IRDA)

Sep 2022 – Feb 2023

Software Tester Intern

- Developed automated E2E test scripts from scratch using Cypress — the first Cypress implementation at the organization — including JSON data setup and version control.
- Conducted manual and automated testing across multiple user roles; created UAT reports and Cypress documentation adopted as company reference standard.
- Analyzed business rules and system requirements to design ePMS screen flows, UI/UX improvements, and collaborated with developers on defect resolution.
