SUMMARY

I am a final-year Bachelor's student in Information Systems (Hons.), specializing in Information System Engineering, completing my internship at The Access Group on 3 February 2026. I am seeking a Software Engineer role where I can leverage my passion for end-to-end software design, development and deployment. With a solid foundation in Object-Oriented Programming (OOP), I specialize in building robust, reusable code that adapt to evolving requirements. I have gained valuable experience in object modeling and applying design patterns to design a centralized and efficient data model solutions. I am committed to continuous learning and adopting industry best practices to stay aligned with the latest technological advancements and trends.

EDUCATION

Bachelor of Information Systems (Hons.) Information Systems Engineering

UiTM Shah Alam, Selangor

Oct 2023 - Jan 2026

- Grade : CGPA 3.71 - Dean's every semester

Related Course : Requirements Engineering, Software Engineering, Database Engineering, Project Management, Java Enterprise Programming

Diploma of Computer Science

UiTM Segamat, Johor

Oct 2020 - Feb 2023

- Grade : CGPA 3.34 - Dean's two semester

Related Course : Web and Mobile Application, Database Design, Algorithm and Computer Solving, Information Systems Development . ([Diploma Stuff](#))

AREA OF EXPERTISE & SKILLS

Technical Programming Skills: Java, Groovy, PHP, Javascript, HTML5, CSS3, Python, Dart, Typescript, Sass, C#

IDE & Development Tools: IntelliJ, Netbeans, Android Studio, VSCode, Ixcanul

Databases: MySQL Workbench, Oracle SQL, MongoDB, SQL Server

Framework & Libraries: Groovy & Grails, Cypress, Spring Boot, Hibernate, Flutter, Laravel, ASP.NET, React

IT Security Tools: Sophos SSL VPN, Fortigate Firewalls, Windows Firewall, AnyDesk

Integration & Messaging Tools: Apache Camel, ActiveMQ

Deployment & Server Tools: Apache Tomcat, XAMP

Data Visualization Tools & Libraries: Rechart, Chart.js, Plotly, Microsoft Power BI

Visual Design Tools: Adobe Photoshop, Adobe After Effects, Adobe Premiere Pro, Adobe Illustrator

Project & Collaboration Tools: GitHub, Draw.io, StarUML, Postman, Trello, ArchiMate, Access Volcanic

Soft Skills & Interpersonal Strengths: Adaptability, Emotional Intelligence, Perseverance, Analytical, Creative and Critical Thinking, Collaboration, Self-Studies, Time Management, Proactive

FINAL YEAR PROJECT (FYP)

FYP TITLE : THE DEVELOPMENT OF ENERGY RESILIENCE ASSESSMENT SYSTEM [ERAS] WITH DATA VISUALIZATION

- This project focuses on developing a system using the adapted prototyping model to visualize data with Chart.js library for evaluating the resiliency of Solar Park and Solar Rooftop at UiTM Solar Sites. It applies descriptive analytics to analyze the calculated data, aiming to identify main critical threats and vulnerabilities. The objective is to support the **UiTM Solar Research Institute (SRI)** in mitigation planning to ensure that **UiTM Solar Sites** maintain consistent energy production and align with their goal of contributing to long-term sustainability.

WORK EXPERIENCE

The Access Group

Sept 2025 - Present

Software Intern

- Develop a Territory Planning App prototype using the Access Evo Development Kit, built with ASP.NET, React, and SQL Server.
- Create a responsive homepage using Access Volcanic (Ixcanul Tools) , applying Sass, media queries, and the BEM methods.
- Capture screenshots and upload them to the Snippet UI to delivery faster and easily review both the snippet and the UI.
- Ensure all snippets are properly categorized and tagged in Ixcanul.

Prisma Harta Sdn. Bhd.

Freelance Software Engineer

Oct 2023 - July 2025

- Developed project plans aligned with company scope, budget, and timeline.
- Proactively conducted meetings to capture relevant requirements and ensure alignment with project goals.
- Managed projects independently, effectively navigating conflicts among stakeholders to ensure smooth progress.
- Gained a thorough understanding of business rules and simplified them for better organization.
- Created system documentation for AMS System Requirement
- Developed an Asset Management System (AMS) integrated with the Tenancy Management System (TMS) to improve complaint work progress traceability.
- Designed and implemented a Schedule Management System for AMS sub-modules, including Vendor Management, Complaint Management, and Job Report Management.
- Built a reporting dashboard to track complaints and work orders with daily, monthly, and yearly analytics.
- Maintained, optimized, enhanced, and deployed the TMS and AMS systems to improve functionality, efficiency, and performance.

Temporary Executive Assistant, Software Engineer

Mar 2023 - Sept 2023

- Developed a Tenancy Management System (TMS) from scratch using Grails to manage information for 1,500 houses and 13 business units, including application, tenant, household, tenancy contract, and vehicle modules, following Agile methodology with incremental and iterative development.
- Handled from data preparation to data conversion by importing and processing over 30,000 past records from multiple Excel formats for TMS in MySQL Database .
- Developed functionality to export list of data to both PDF and Excel formats, enhancing report generation and data accessibility for both soft and hard copies.
- Developed various type of reports (static & auto generated) and also interactive dashboards using Chart.js to visualize key data metrics, enhancing decision-making and data analysis .
- Set up the server environment, including both testing and production, also deployed the web apps on Apache Tomcat and optimizing web app performance based on server configuration.
- Created automated batch scripts for database backups , streamlining daily maintenance and data protection.
- Conducted user training sessions by , improving system adoption and user efficiency across three departments (Tenancy, Asset, Finance).
- Internship guidance, assisting in requirement gathering, create automated test scripts and frequent update system documentation.

Iskandar Regional Development Authority (IRDA)

Internship, Software Tester

Sept 2022 - Feb 2023

- Learn the business rules of the Corporates Service's organization.
- Analyze business rules & design eProcurement Document Enhancement (ePMS) screen flow system.
- Meeting with the domain expert to understand system enhancement requirement.
- Understanding system requirement for UI/UX design based on end-user document.
- Setup Json data & create new version code script for automated testing using cypress from scratch.
- Reviewing software requirement and learn to preparing primary & alternate test scenarios.
- Manual system testing to create the issues & understand the end-to-end system flow.
- Interacting with web developer to define the bug of system & future minor request for the automated test.
- Learn how to debug test script, update & analyse test results before send to the developer.
- Learn to create User Acceptance Test (UAT) Report for each role in eProcurement Document Enhancement System (ePMS)
- Create Cypress documentation for company reference.

ACHIEVEMENT

Iskandar Regional Development Authority (IRDA)

- Enhanced system quality by 50% and reduced manual testing through end-to-end automation.
- Translated implicit user needs into clear, actionable documentation.
- Pioneered the company's first Cypress framework as an automated testing tool.

Prisma Harta Sdn. Bhd

- Increased departmental efficiency by 60% by digitalizing tenancy and asset management processes.
- Reduced reporting time by 80% through implementation of automated reports and interactive dashboards.
- Enhanced data consistency by 80% via centralized and structured database.

ADDITIONAL INFORMATION

• Activities:

- 8th ASEAN Smart Grid Congress (ASGC8) Participation
- Participate Rih Raya Heitech Busking Performance 2025
- Participate Festival Buskers UiTM 2024
- Volunteer Nadi Madani 2024
- Volunteer for Planting Seeds for Change 2024
- Performers for LA MEMORIA NIGHT 2022
- Actor Mini theater for CHASITY CAMPAIGN 2022

• Certifications:

- FYP Gold Award – Penang International Invention, Innovation, and Design (PIID) 2025
- Software Test Design Competition (TDC) 2025 participation
- Participation of KYouth Programme
- Prosolve 20205 Coding Competition Participation
- Microsoft Power BI For Beginner

• Language :

- Malay (Native)
- English (Intermediate)
- Chinese (Beginner)
